Your Money is Safest in the Bank

COVID-19 is causing many concerns. One thing you can count on is the safety of your money in the bank.

1. You have continued access to your funds and bank services.

You have access to your funds through in-person services and electronic tools, such as mobile apps and online banking.

2. Your money is safe, secure, and insured.

The Federal Deposit Insurance Corporation insures individual bank deposits for up to \$250,000. No consumer has lost a single penny in the history of this insurance fund.

3. Your bank is prepared.

Banks are prepared for situations like a pandemic, with tested and proven business continuity plans and procedures.

4. Your bank is looking out for you, your family, and your business.

North Dakota's banks are working with customers and providing assistance. Bankers are also helping their customers apply for grants and federal assistance, such as the SBA program.

5. Your banker is listening and ready to act.

Reach out to your banker with any concerns. North Dakota's banking industry is strong and ready to help.
